

# Kitchen Video System

*Flexibility is essential in your Quick Serve operation, as is customization. NEC's simple setup and user-friendly menus allow you to customize the Kitchen Video System (KVS) to meet your ever changing requirements.*

*Our KVS offers many features to help streamline your operation. Level routing will increase store efficiency according to daily store operations. Speed of service is improved with item routing by destination, exception routing, order park feature, screen color and display overflow. Multi-language capability by item description will assist kitchen staff with order accuracy.*

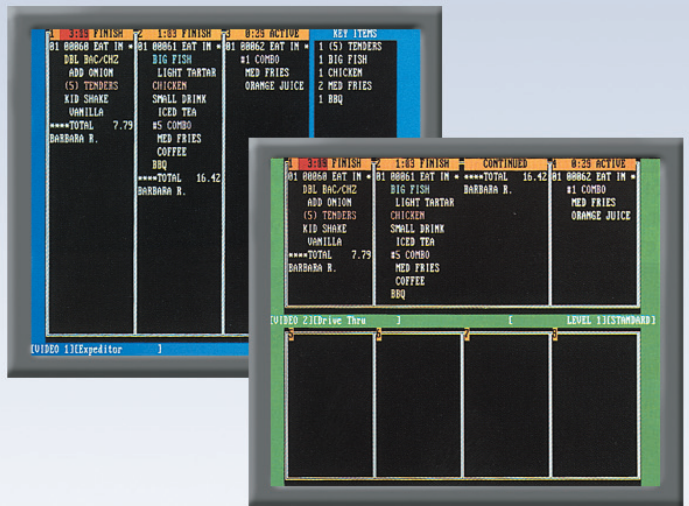

*Once again, NEC provides Powerfully Simple, Powerfully Quick solutions for your Quick Serve and Fast Casual operation.*
